Advance Directives

An "Advance Directive" is a general term that refers to your instructions about your medical care in the event that you become unable to voice these instructions yourself. Each state regulates advance directives differently. California laws regarding Advanced Directives are found in the California Probate Code Section 4670 to 4678 and 4700 to 4701. You have the right to informed decision making regarding your care, including information regarding Advance Directives and this facility's policy on Advance Directives. Applicable state forms will also be provided upon request. A member of our staff will be discussing Advance Directives with the patient (and/or patient's representative) prior to the procedure being performed.

Casa Colina Surgery Center respects the rights of patients to make informed decisions regarding their care. The Center has adopted the position that an ambulatory surgery center setting is not the most appropriate setting for end of life decisions. Therefore, it is the policy of this surgery center that if there is a deterioration in the patient's condition during treatment at the surgery center, the personnel at the center will initiate resuscitative or other stabilizing measures and transfer the patient to an acute care hospital. At the acute care hospital, further treatment decisions will be made. If copies of the patient's Advance Directives have been provided to the surgery center, copies will be sent with the patient to the hospital.

Should the patient so desire, after review of this information and discussion with a member of the surgery center staff, assistance will be provided by the Center in rescheduling the procedure to an alternate facility.

If you have a problem or complaint, please speak to one of our staff to address your concern. If necessary, your problem will be advanced to center management for resolution.
